- Single hand adjustment for various screen heights
- Designed for fast loading and unloading, without spring-loaded effort
- Toolless changing of troughs
- German engineered for years of reliable use
- U.S.-based service technician available
- Stocked in Duluth, MN

IT'S TIME TO GO PRO

Manually coating screens is strenuous, exhausting and often inconsistent. The ChromaCoat 20 Single Screen Auto Coating Machine allows your growing shop to eliminate a key variable in the printing process without breaking the bank. Consistent screen coating allows for consistent stencil thickness, consistent exposure times and ultimately, consistent print results.
