### Chromaline Introduces New AccuArt Inkjet Film

The Chromaline Corporation announces the introduction of new **AccuArt** waterproof inkjet film. **AccuArt** films enable you to create high quality film positives using your computer and an inkjet printer. **AccuArt** films eliminate the need to outsource for other costly film positives, saving you production time and money.

**AccuArt** inkjet films offer the following benefits:

- Produce films from your inkjet printer from 8 1/2" x 11" to 60" x 66'
- DMAX of up to 4.2, DMIN of .07
- Produce outstanding digital images of line art, halftones and 4 color separations up to 65 LPI direct from your computer to film
- No expensive laser printer or image setter necessary
- Ink dries instantaneously on waterproof film and becomes impervious to water in the screen making process and high humidity environments
- 10 times the clarity of Vellum

**AccuArt** films are available in rolls and cut sheets. For more information and sizes available, call The Chromaline Corporation at **1-800-328-4261**.

The Chromaline Corporation is a Duluth, Minnesota based developer, manufacturer and worldwide marketer of photochemical imaging systems for the screen printing industry.
