## **CHROMALINE HIRES LARRY TYWATER AS TECHNICAL SALES REPRESENTATIVE**

DULUTH, MN. — Chromaline Screen Print Products announced it has added Larry Tywater to its team of Technical Sales Representatives.

Larry will serve states in the southeastern region of the US, providing sales and technical support for Chromaline's screen printing products. Larry will also be active in training and supporting Chromaline dealers in his territory.

Larry has a strong background in screen printing, particularly in prepress applications where he's completed advanced seminars in UV curing, four-color process printing and screen preparation. Prior to Chromaline, Larry was a sales and technical representative for Nazdar Greensboro, NC where he was active in all aspects of screen printing product sales and service.

"We are pleased to have Larry join the company," said Parnell Thill, Chromaline's Marketing Director. "His knowledge of the screen printing industry coupled with his sales experience will make Larry an immediate asset to the Chromaline sales team."

"I am very excited about being part of a company like Chromaline," said Tywater. "They are truly focused on customers and their needs as well as providing outstanding products to the industry. I am very happy to be a part of that and look forward to a bright future with Chromaline."

Chromaline Screen Print Products is a leading supplier of photo stencil films, emulsions and screen preparation products for the screen printing industry. For more information, visit [www.chromaline.com](http://www.chromaline.com).
