IKONICS LAUNCHES LASER TAPE PRODUCT

DULUTH, MN - IKONICS Corporation, a Duluth based imaging technology company, announced today the introduction of PhotoBrasive Systems Laser Tape. Laser Tape is engineered to be imaged by a laser to create a stencil, for use in the abrasive etching of glass and other substrates. This growing technology combines laser engraving and abrasive etching for the creation of fine images.

PhotoBrasive Laser Tape is free of vinyl, a chemical harmful to lasers, and is easy to apply and remove. It has been endorsed by L. Steven Spence, a recognized expert in laser engraving.

Bill Ulland, IKONICS CEO, said, "Laser Tape is a further step toward our goal of providing specialized imaging systems to world markets."

IKONICS stock is listed on the Nasdaq SmallCap market under the symbol IKNX.
